14<sup>th</sup> July 2022

Dear Parent/ Carer

I am writing to offer your child the opportunity to study GCSE Statistics to supplement their Mathematics course at Morton Academy.

GCSE Statistics is an extra GCSE qualification for your child that would fit around the course content studied in Maths. The course delves deeper and provides a richer understanding for the statistics content covered in their GCSE Maths. As well as being an additional qualification in its own right. The intention is for the exam to be taken at the end of Year 10.

This course is only being offered to selected students, and I would encourage your child to consider taking this opportunity to develop their skills further in mathematics. It is to be noted that this course is free of charge and will not replace any current GCSE options, nor will it affect their timetable – I am aiming to run the course during one lunchtime per week (the day to be confirmed).

It is essential that once signed up your child attends these classes without disruption. Failure to attend regularly would result in being asked to discontinue the course. If your child is interested, please return the reply slip below. Further details will be provided following confirmation of dates and returned interest. If you have any questions, please email me: [Andrew.osborne@rrma.org.uk](mailto:Andrew.osborne@rrma.org.uk).

Yours sincerely

*Andrew Osborne*
